REGISTRAR-GENERAL

THE HONOURABLE MACKINNON PHILLIPS, M.D., C.M., LL.D.

REGISTRAR-GENERAL

## *Foreword*

I take pleasure in presenting the 88th Annual Vital Statistics Report compiled by the Office of the Registrar-General. This report is prepared in two parts.

Part I consists of an analytical survey of the vital statistics of the Province, and, in so far as can be portrayed by vital statistics, indicates the trend over the past years in the general state of health of the people of Ontario. In the light of such general trends, it is possible to assess the vital statistics for the year 1957. It also emphasizes certain specific problems in the field of public health such as infant and maternal mortality and deaths from such diseases as heart and cancer.

Part II comprises detailed tables covering the various aspects of vital statistics for the Province of Ontario in 1957.

In conclusion, may I state that while this report is primarily of interest to certain professions and agencies, it will give any interested parties a real insight into the vital statistics concerning births, marriages and deaths of the Province of Ontario.

A handwritten signature in dark ink, appearing to read "Dr. J. Phillips". The signature is fluid and cursive, with a large, sweeping initial "D".

M.D., C.M., LL.D.

*Registrar-General.*

SIR :

I have the honour to submit for your approval the Eighty-eighth Annual Vital Statistics Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1957.

I have the honour to be, Sir,

Your obedient servant,

R. B. WALLACE,  
*Deputy Registrar-General.*

TO THE HON. MACKINNON PHILLIPS, M.D., C.M., LL.D.  
*Registrar-General of Ontario.*

TABLE 21	Marriages, Ages of Brides by Ages of Bridegrooms, Ontario, 1957.....	71
TABLE 22	Marriages, Religious Denominations of Bridegrooms by Religious Denominations of Brides, Ontario, 1957.....	72
TABLE 23	Marriages, Birthplaces of Bridegrooms by Birthplaces of Brides, Ontario, 1957..	74
TABLE 24	Infant Deaths and Infant Deaths in Hospitals by Place of Occurrence and Place of Residence for Counties and Districts, Ontario, 1957.....	75

TABLE 25	Infant Deaths and Infant Deaths in Hospitals by Place of Occurrence and Place of Residence for Cities, Towns and Villages of 1,000 Population and Over (at the Census of 1956), Ontario, 1957.....	76
TABLE 26	Infant Deaths and Infant Deaths in Hospitals by Place of Occurrence and Place of Residence for Certain Townships, Ontario, 1957.....	79
TABLE 27	Infant Deaths by Month of Birth, by Month of Death and Sex, by Place of Residence, Ontario, 1957.....	80
TABLE 28	Causes of Infant Deaths by Sex and Age, by Place of Residence, Ontario, 1957..	82
TABLE 29	Causes of Infant Deaths by Sex and Month of Death, by Place of Residence, Ontario, 1957.....	86
TABLE 30	Deaths and Deaths in Hospitals by Place of Occurrence and Place of Residence for Counties and Districts, Ontario, 1957.....	88
TABLE 31	Deaths and Deaths in Hospitals by Place of Occurrence and Place of Residence for Cities, Towns and Villages of 1,000 Population and Over (at the Census of 1956), Ontario, 1957.....	89
TABLE 32	Deaths and Deaths in Hospitals by Place of Occurrence and Place of Residence for Certain Townships, Ontario, 1957.....	92
TABLE 33	Deaths by Single Years of Age and Sex by Place of Residence, Ontario, 1957..	93
TABLE 34	Deaths by Place of Occurrence and Place of Residence, 1957.....	94
TABLE 35	Deaths, by Cause, Sex, and Age, by Place of Residence, Ontario, 1957.....	96
TABLE 36	Cause of Death by Sex for Counties, (including Cities, Towns and Villages) by Place of Residence, Ontario, 1957.....	106
TABLE 37	Deaths, by Cause, Sex and Age, by Place of Residence, Metropolitan Toronto, 1957.....	124
TABLE 38	Cause of Death by Sex for Cities, Towns and Villages of 5,000 Population and Over (at the Census of 1956) by Place of Residence, Ontario, 1957.....	134
TABLE 39	Cause of Death by Sex for Certain Townships, Ontario, 1957.....	166
TABLE 40	Cause of Death by Marital Status, Age, Sex, and Month of Death by Place of Residence, Ontario, 1957.....	176

## PART I. COMPARATIVE AND ANALYTICAL SUMMARY

## Population

For reference purposes the estimated population of the province over a period of three decades is shown by sex and age in Table A, while a distribution by sex and age-groups of the estimated population of 1957 is provided in Table B.

TABLE A POPULATION, CENSUSES 1921, 1931, 1941, 1951 AND 1956 AND ESTIMATED FOR INTERCENSAL YEARS, BY SEX AND AGE GROUP, ONTARIO

(In Thousands)

\* Born to unmarried mothers

There was a definite increase in live births in 1947 when the rate was 26, decreasing slightly for the years 1948 to 1950 and showing a decided increase for the years 1951-1957.

The stillbirth rate, on the other hand, has been on an extremely encouraging downward trend. In 1957 for every 1,000 babies born alive, 13 were stillborn.

With respect to illegitimacy, Table G and Chart 2 indicate that the great majority of the illegitimate live births occur to mothers under 25 years of age. Of every 100 such births in 1957, 77 were to this group of mothers.

# PERCENTAGE OF LIVE BIRTHS, STILLBIRTHS AND ILLEGITIMATE BIRTHS IN EACH AGE GROUP OF MOTHERS

ONTARIO  
FIVE-YEAR AVERAGES 1936-1955  
AND FOR THE YEAR 1957

## Stillbirths

In 1953, for the first time, certain detailed information regarding stillbirths registered in Ontario was published in this Report.

The data included in the following three tables comprises the total number of stillbirths (1,999) registered to resident mothers of this Province, 1957.

Of the 1,999 stillbirths registered during the year, 1,178 or 58.9 per cent occurred at or near term, while 812 or 40.6 per cent were recorded as less than 37 weeks' gestation (Table I(1)).

In Table I(2) there are shown the ten major categories of causes of stillbirth according to the age of the mother while in Table I(3) the same ten causes of stillbirth are set out by periods of gestation.

TABLE I(1) STILLBIRTHS BY AGE OF MOTHER AND REPORTED PERIOD OF GESTATION, ONTARIO, 1957

Chart 3

# INFANT MORTALITY

ONTARIO

DEATH RATES PER 100,000 LIVE BIRTHS

AT EACH AGE PERIOD

FIVE YEAR AVERAGES 1941-1955

AND FOR THE YEAR 1957

### Infant Mortality

Table J and Chart 3 both show very clearly that although infant and neonatal mortality rates have declined during the past ten years the actual number of children who died before they reached one year of age has increased. These increases must be considered in comparison with the extensive increase in the number of births during the same period.

### Sixth Revision of the International Lists of Diseases and Causes of Death

The introduction of the new International Statistical Classification in 1950 was accompanied by a change in the procedure of selecting a cause of death for tabulation where multiple causes were stated. Under the new selection procedure, the cause for tabulation is based on the preference expressed by the physician on the medical certificate as indicated by the order in which he records the causes. This method has replaced the former procedure of arbitrary selection by rules.

The effect of the statistical assignments being guided by the physicians' preference is to make recorded mortality more closely reflect clinical opinion, and the recorded mortality is lowered for certain causes and increased for others. The most dramatic illustration of this is given by diabetes, the deaths for 1957 being 608, as compared with 1,157 in 1949.

Noteworthy differences between the figures for 1950-1957 and those for the preceding ten-year period are seen for prematurity, diseases of early infancy, nephritis and diabetes mellitus. In the Fifth Revision of the International List of Causes of Death, "prematurity" (immaturity) was given a high priority in classification. Following the Sixth Revision, various conditions under "Certain Diseases of Early Infancy" were sub-divided as to whether or not there was mention of prematurity. Prematurity became a secondary entity, a residual category being provided when another cause for classification was not recorded.

In the case of diabetes mellitus, the difference is due entirely to the method of selecting the cause of death to be tabulated. Diabetes mellitus was formerly given a high preference when jointly stated with other causes; now, if the physician records diabetes as a contributory condition under Section II of the Medical Certificate, indicating that it was a contributing factor but not the disease which initiated the train of events leading to death, the death is not attributed to diabetes, but to one of the causes set out in Section I.

Terms denoting arteriolar nephrosclerosis, once classified under chronic nephritis, have been assigned to classifications under hypertensive diseases. Fewer deaths are therefore now attributed to nephritis, while the number of deaths assigned to "hypertension without mention of heart disease" shows a considerable increase.

## General Mortality

Table N presents an historical summary of deaths by sex in the province and the computed crude death rates over a 30-year period while Chart 1 presents a graphic picture of the general trend in the rate.

The death rate among males has been consistently higher than that among females.

TABLE N DEATHS (EXCLUSIVE OF STILLBIRTHS) AND DEATH RATES PER 1,000 POPULATION, ONTARIO, 1925-1957

YEAR	Deaths			Rate per 1,000 Population

NOTE—Previous to 1950 deaths from late effects of acute poliomyelitis, acute infectious encephalitis, measles, mumps, scarlet fever, typhoid fever, diphtheria and whooping cough were not tabulated separately.

Chart 5

DEATHS FROM  
TUBERCULOSIS, CANCER AND PNEUMONIA  
ONTARIO, 1947 - 57

RATES PER 100,000 POPULATION

\* The 1950 to 1957 figures comprise the malignant neoplasm group (categories 140-205 under the 6th Revision of the International List of causes of death).

## Mortality from Tuberculosis

Table S (1) shows the deaths from all forms of tuberculosis in the province from 1948 to 1957. Table S (2) shows the death rates per 100,000 population classified by the age of the decedents from 1948 to 1957. During the year 1957 tuberculosis mortality rate was the lowest ever recorded in Ontario, that of 3.9 per 100,000 of population. Chart 5 illustrates the reduction in mortality from tuberculosis which has taken place since 1947.

Table S (3) in Part 1 of this report gives details of deaths and death rates for counties, cities, towns and villages of 5,000 population and over according to place of occurrence and place of residence for the year 1957.

## Mortality from Cancer

Chart 5 illustrates the trend in the mortality rate from cancer. The increase in the total number of deaths since 1948 is shown in Table T (1) and is apparent in most of the age groups particularly among older persons. Table T (2) shows the rate from 1948 to 1957 by sex.

TABLE T (1) DEATHS FROM CANCER, BY AGE AND SEX, ONTARIO, 1948-1957

Rates per 100,000 of population by sex. \*Include Hodgkin's disease and the leukaemias.

### Marriages

From Table W it will be noted that there have been significant fluctuations in the number of marriages in the province from 1933 to 1957.

**TABLE W MARRIAGES AND MARRIAGE RATES PER 1,000 POPULATION, ONTARIO, 1933-1957**

YEAR	Number	Rate per 1,000 Population	YEAR	Number	Rate per 1,000 Population
1933.....	22,587	6.4	1945.....	34,137	8.5
1934.....	25,874	7.3	1946.....	46,073	11.2

1944.....	31,227	7.9	1956.....	46,282	8.6
			1957.....	46,780	8.3

### Divorces

In Ontario, divorced persons form a very small proportion of the population as compared with some of the other countries of the world. The following summary indicates the number and percentages of such persons in the population of the province as enumerated in the past five censuses.

	1921*	1931	1941	1951	1956
Divorced persons—Male.....	1,135	1,071	2,291	4,766	5,529
Female.....	1,369	1,015	2,865	7,668	9,069
Per cent of population—Male.....	0.08	0.06	0.12	0.21	0.20
Female.....	0.09	0.06	0.15	0.34	0.34

\*Including legal separations.

An historical summary of the number of marriages dissolved in Ontario since 1919 is presented in Table X. Previous to 1920 very few divorces were granted in the province. There was no appreciable increase in the number till the late 1920's, but since the transfer in 1930 of jurisdiction from the Dominion Parliament to provincial courts there has been a steady annual increase.

**TABLE X DISSOLUTIONS OF MARRIAGE (DIVORCES) AND RATE PER 100,000 POPULATION, 1919-1957, AND RATIO OF DISSOLUTIONS TO MALES AND FEMALES, 1935-1957**

Year	Dissolutions of Marriage	Rate per 100,000 Population	Year	Dissolutions of Marriage	Rate per 100,000 Population	DISSOLUTIONS GRANTED TO—		Ratio of Dissolutions to Males per 1,000 Dissolutions to Females
						Husbands	Wives	
1919	46	1.6	1935	491	13.7	180	311	579
1920	89	3.1	1936	519	14.3	174	340	512
